

CARPETLIGHT®

Perfectly light.

World's unique flexible lighting system

The CARPETLIGHT CL series is a new generation of fully flexible, light weight, ultra bright and high quality LED Soft Lights, that opens up entirely new possibilities in film-lighting.

Our patent-pending light source design with all its new features is the result of intensive research and the combination of the latest textile and power supply technologies.

The first model of the CARPETLIGHT CL series measures 400 mm x 600 mm (featuring a light aperture of 320 mm x 540 mm), and will be initially available from July 2015.

CARPETLIGHT CL series is the most versatile soft light on the market; never has there been a lamp more flexible and light weight.

It is fully adjustable between 2,700 K and 5,800 K, with excellent colour rendition over the entire range and the CRI value always surpassing 95.

The R9 (red) value outperforms most LED Panel Lights with a Value of over 85, giving the CARPETLIGHT CL20 a full colour spectrum without compromise.

CARPETLIGHT CL series emits a high amount of light in a soft and uniform beam field. Brighter than a 4 Tube Fluorescent Softlight, with full flexibility and weighing only 300 g, the lamp is lighter than any existing professional lampheads on the market.

Our Power Supply Unit has a unique non PWM Dimming feature that allows for total flickerfree operation at all framerates. It also creates a smooth and comfortable constant light never before seen in the LED Panel Light segment.

Our lamp conforms to the highest standards. Using German and Swiss technology, it is assembled by hand with the greatest care in St Pauli, Hamburg, Germany.

Created & crafted in Hamburg

**"They said it's bright. But man
you can lit hell with it.
That's awesome."**

— Alex Warren, Director (Elenor)
